PROBLEM 1

Statement | Submissions | Solution | AI Help

Area & Perimeter of Rectangle

Listen

Write a program for the following problem

- Let's consider a rectangle of length `11` and breadth `13`.
- `Output` the following on separate lines:
  - `Area` of the `rectangle` having sides as `11` and `13`
  - `Perimeter` of the `rectangle` having sides as `11` and `13`

For any rectangle, the formula for area is length * breadth.
The formula for perimeter is 2 * (length + breadth).

Expected output

```
143
48
```

SOLUTION 1

Prev | Next

Python3

```python
# Update the '_' below to solve the problem

print(11 * 13)          # Area of the rectangle

print(2 * (11 + 13))    # Perimeter of the rectangle
```

Your Output

```
143
48
```

You got it right!

Submit | Next

PROBLEM 2

Statement

Write a program to output the squares (using multiplication) of numbers from 1 to 5 on separate lines.

[**Note:** Please print in the same format as given below. There are single spaces between hyphen(-) and digits.]

Output Format

```
1 - 1
2 - 4
3 - 9
4 - 16
5 - 25
```

SOLUTION 2

Python3

```python
for i in range(1,6):
    print(i,"-",i*i)
print()
```

Your Output

```
1 - 1
2 - 4
3 - 9
4 - 16
5 - 25
```

Submit Next

PROBLEM 3

Statement

Write a program to output the square of * (stars) of size 4 (check the output below).

```
****
****
****
****
```

SOLUTION 3

Python3

```python
# cook your dish here
for i in range(4):
    for j in range(4):
        print("*",end="")
    print()
```

Your Output

```
****
****
****
****
```

DIGITAL LITERACY AWARENESS QUIZ

Sneha Bakre 25BCY10096

This form is automatically collecting emails from all respondents. Change settings

1. What does digital literacy primarily refer to? *

- Using social media daily
- Ability to use digital tools responsibly and effectively
- Playing online games
- Typing fast on a keyboard

2. Which of the following is a safe internet practice? *

- Using the same password everywhere
- Sharing passwords with friends
- Clicking unknown links quickly
- Verifying email sources before responding

3. Why is maintaining a professional online presence important? *

- To gain more followers
- To impress friends
- To create a positive impression for opportunities
- To post daily updates

4. What is a common sign of a phishing attempt? *

- Personalized and verified message
- Urgent request for sensitive information
- Message from a known contact
- Proper company email address

5. Digital literacy is not just about using technology, but also about understanding the _____ and responsibilities associated with it. *
